

Product Guide Sheet

Short Reach Extender Jib

Our Short Reach Extending Jib allows previously inaccessible loads to be handled safely. The jib can be fitted to a forklift truck simply; remove the heel pin and drive the truck slowly forwards until fully sleeved. Re-fit the heel pin behind the truck forks. Ensure the jib is fully secured before lifting.

Our Short Reach Extending Jibs allow transportation of long loads safely. The two hooks provided allow loads to be slung at greater centres than with a conventional jib. The greater length allows previously in-accessible loads to be handled. Manual Extension.

Model Ref.	Truck Capacity (kgs)	"A" Hook Height (mm)	"B" Closed Length (mm)	"C" Open Length (mm)	"D" Fork Spread (mm)	"F" Fork Max Width (mm)	"E" Max Fork Thickness (mm)
SRX 500-1.8	2000	191	1250	1750	496	125	50
