

Product Guide Sheet

Stablemate II Access Platforms

Our best selling Stablemate Access Platforms offer the ideal solution to your needs, when elevation is needed during stocktaking, inspection etc.

To fit; simply drive the truck slowly into the platform sleeves, once the forks are fully sleeved simply re-fit the heel pin behind the truck forks, thus retaining the attachment.

Note: The truck parking brake must be applied when personnel are inside the platform. Vertical movement permitted only.

All Platforms comply to PM28.

Stablemate Platforms are the perfect answer for stocktaking, high level maintenance or routine inspection. A superior platform manufactured to a high specification. All have safety harness rails and positive heel locking. Where gates are fitted, locks operate automatically when the platform is raised.
